Note Well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- the IETF plenary session,
- any IETF working group or portion thereof,
- the IESG or any member thereof on behalf of the IESG,
- the IAB or any member thereof on behalf of the IAB,
- any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices,
- the RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 3978 (updated by RFC 4748) and RFC 3979(updated by RFC 4879).

Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 3978 (and RFC 4748) for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

Vcarddav

- **Dependency on webdav-mkcol**
 - Draft is wg draft, but expired
- **Is vcarddav and mkcol ready for WG LC?**
- **If yes, then suggested plan:**
 - WG LC combined on vcarddav and mkcol
 - Have apps area review specially for mkcol (webdav experts)
-

Future Work

Vcarddav Charter Excerpt

This WG will produce the following outputs:

- (1) A revision of the vCard specification
- (2) An address book access protocol leveraging the vCard data format.

After 1 and 2:

- (3) An XML schema which is semantically identical to vCard
- (4) Identifying useful deployed vCard vendor extensions and creating standards track versions of those extensions.
- (5) Cooperate with the Sieve WG to produce a Sieve extension for address book Sieve tests.
- (6) LDAP mapping to the new vCard format without loss of data.

 **CALL FOR VOLUNTEERS?** (Individual submissions until 1 and 2 are done)
